JOURNAL OF DAIRY RESEARCH

EDITED BY

J. E. FORD, PH.D.
National Institute for Research in Dairying,
Shinfield, Reading, Berkshire

J. A. B. SMITH, C.B.E., PH.D., D.SC.
Hannah Dairy Research Institute, Ayr, Scotland

ASSISTED BY

MR B. F. BONE (Reading)
DR G. C. CHEESEMAN (Reading)
PROF. L. F. L. CLEGG (Canada)
SIR DAVID CUTHBERTSON C.B.E., F.R.S.E. (Glasgow)
DR F. H. DODD (Reading)
DR H. P. DONALD F.R.S.E. (Edinburgh)
PROF. P. J. FOURIE (South Africa)
DR T. GIBSON (Edinburgh)
DR J. O. IRWIN (London)
MR G. LOFTUS HILLS (Australia)
DR L. A. MABBITT (Reading)
DR W. A. McGILLIVRAY (New Zealand)
DR A. ROBERTSON O.B.E., F.R.S. (Edinburgh)
DR K. C. SEN (India)
DR C. C. THIEL (Reading)
DR R. WAITE (Ayr)
DR J. C. D. WHITE (Ayr)

No. 1 (February 1971)

PAGE

Obituary Professor S. J. Folley 1

Local cooling of the mammary gland and milk production in the cow. C. W. Holmes 3

The specificity for κ-casein as the stabilizer of α_s-casein and β-casein. I. Replacement of κ-casein by other proteins. Margaret L. Green . 9

The specificity for κ-casein as the stabilizer of α_s-casein and β-casein. II. Replacement of κ-casein by detergents and water-soluble polymers. Margaret L. Green 25

Influence of the physical form of a barley grain and barley straw diet on nitrogen metabolism in sheep. P. Jackson, J. A. F. Rook and K. G. Towers 33

The effects of 2 methods of incorporating soybean oil into the diet on milk yield and composition in the cow. W. Steele, R. C. Noble and J. H. Moore 43

The effects of dietary soybean oil on milk-fat composition in the cow. W. Steele, R. C. Noble and J. H. Moore 49

The relationship between plasma lipid composition and milk fat secretion in cows given diets containing soybean oil. W. Steele, R. C. Noble and J. H. Moore 57

Changes in the composition of bovine milk fat during milking. Elizabeth A. Kernohan, J. C. Wadsworth and A. K. Lascelles 65

Purification of rennin. A. V. Castle and J. V. Wheelock 69

The effects of increasing amounts of dietary coconut oil on milk-fat secretion in the cow. J. E. Storry, A. J. Hall and V. W. Johnson 73

Reviews of the progress of Dairy Science. Section E. Diseases of dairy cattle. Thiamine deficiency, with particular reference to cerebrocortical necrosis. E. E. Edwin and Gwyneth Lewis 79

Section B. Bacteriology. The survival of pathogens in cheese and milk powder. Barbara P. Keogh 91

Errata 113

No. 2 (June 1971)

PAGE

A kinetic model of the clotting of casein by rennet. W. B. Tuszyński . . 115

Growth of *Streptococcus lactis* in milk in a continuous fermenter. P. M. Linklater and C. J. Griffin 127

A laboratory study of continuous fermentation of skim-milk for the production of sour curd cheese. P. M. Linklater and C. J. Griffin . . 137

The effect of ageing on heat-sterilized milk. J. V. Wheelock and E. J. Hindle 145

Density-gradient electrophoresis of native and of rennet-treated casein micelles. Margaret L. Green and G. Crutchfield 151

Influence of sodium chloride on the proteolysis of casein by rennet and by pepsin. P. F. Fox and B. F. Walley 165

Bovine milk esterases. B. J. Kitchen 171

The Chemical composition and physical properties of fractions of milk fat obtained by a commercial fractionation process. R. Norris, I. K. Gray, A. K. R. McDowell and R. M. Dolby 179

Properties of aseptically-packed UHT milk: casein modification during storage and studies with model systems. A. T. Andrews and G. C. Cheeseman. 193

Factors affecting the concentration of vitamins in milk. III. Effect of season and solar radiation on the vitamin D potency of butter. Kathleen M. Henry, Zena D. Hosking, S. Y. Thompson, Joyce Toothill and J. D. Edwards-Webb 209

A double-bed process for the removal of cationic fission products from milk. R. F. Glascock and D. T. W. Bryant 217

Reviews of the progress of Dairy Science. Section A. Physiology. Hormonal control of lactogenesis. R. Denamur 237

No. 3 (October 1971)

Obituary Dr S. J. Rowland 265

The action of rennets on the caseins. I. Rennin action on β-casein-B in solution. L. K. Creamer, O. E. Mills and E. L. Richards 269

Seasonal variations in the viscosity and adhesive strength of casein from the milk of individual cows. II. C. R. Southward and R. M. Dolby . . 281

The effects of nutritional level on milk yield and milk composition in cows and heifers. S. Gordin, R. Volcani and Yehudith Birk 287

The effect of varying ratios of roughage to concentrates on composition and yield of cow's milk. S. Gordin, R. Volcani and Yehudith Birk . . 295

Effects of drenching with a 'pluronic' on bloat and milk production. D. E. Wright 303

PAGE

The effects of dietary urea and ammonium sulphate on the yield and composition of sheep milk. G. TANEV 309

The metabolism of [U-^{14}C]glucose, [1-^{14}C]palmitic acid and [1-^{14}C]stearic acid by the lactating mammary gland of the sow. J. SPINCER and J. A. F. ROOK 315

Changes on storage in milk processed by ultra-high-temperature sterilization. RUTH SAMEL, R. W. V. WEAVER and D. B. GAMMACK 323

The concentrations of some water-soluble constituents in the milks of cows, sows, ewes and goats. A. KONAR, P. C. THOMAS and J. A. F. ROOK . 333

Heat-induced interaction of β-lactoglobulin and κ-casein. G. H. MCKENZIE, R. S. NORTON and W. H. SAWYER 343

A use of the computer as an aid in diagnosis of metabolic problems of dairy herds. G. J. ROWLANDS and RITA M. POCOCK 353

Some effects of unsaturated oils given to dairy cows with rations of different roughage content. J. W. G. NICHOLSON and J. D. SUTTON 363

Concentration of milk by ultrafiltration and reverse osmosis. F. A. GLOVER . 373

Effect of fibre level in the diet of the dairy cow on milk yield and composition. F. J. GORDON and T. J. FORBES 381

The influence of pH and heat-treatment on the colour and stability of ultra-high-temperature sterilized milk. J. G. ZADOW 393

Comparison of milks processed by the direct and indirect methods of ultra-high-temperature sterilization. V. Denaturation of the whey proteins. R. L. J. LYSTER, T. C. WYETH, A. G. PERKIN and H. BURTON . . 403

Some aspects of the chemical composition of the milk fat globule mebmrane during lactation. M. ANDERSON and G. C. CHEESEMAN 409

Reviews of the progress of Dairy Science. Section A. Physiology. Organ culture techniques and the study of hormone effects on the mammary gland. ISABEL A. FORSYTH 419

Index of Subjects

Ammonium sulphate, fed, sheep, milk yield and composition, 339

Bacteria, pathogenic, survival, cheese, milk powder (review), 91
Barley, physical form, nitrogen metabolism, rumen, 33
Bloat, control by 'pluronic', milk production, 303
Blood, lipids, content, feeding concentrates containing soybean oil, 57
Butterfat, *see* **Milk fat**

Casein(s), changes, UHT sterilized milk, stored, 193
coagulation, rennet, kinetic model, 115
micelles, native, rennet-treated, electrophoresis, 151
stabilizers, detergents, water-soluble polymers, 25
proteins, 9
proteolysis, rennin, pepsin, influence of sodium chloride, 165
viscosity, adhesive strength, seasonal variation, 281
β-Casein, action of renin, 269
κ-Casein, β-lactoglobulin, interaction, heat-induced, 343
Cerebrocortical necrosis (review), 79
Cheese, pathogenic bacteria, survival (review), 91
Cheesemaking, laboratory scale, continuous lactic acid fermentation, 127
sour curd cheese production, 137
Coagulation, milk, rennet, action, kinetic model, 115
Coconut oil, in concentrates, milk fat yield, 73
Computer, diagnosis, metabolic problems, dairy herds, 353
Concentrates, containing, coconut oil, milk fat yield, 73
soybean oil, blood, lipids, content, 57
unsaturated fish oils, varying roughage, rumen fluid composition, milk fat content, 363
varying ratio of roughage, milk yield and composition, 287, 295
Concentration, milk, ultrafiltration and reverse osmosis, 373

Detergents, casein micelle stabilizers, 25
Diet, *see also* **Concentrates**
energy-, fibre-intake, milk yield and composition, 381
physical form, nitrogen metabolism, 33
urea, ammonium sulphate, milk yield and composition, ewes, 309
Disease, *see* **Cerebrocortical necrosis**

Energy intake, milk yield and composition, 381
Enzymes, *see* **Esterases, Pepsin, Rennet, Rennin**
Esterases, in milk, 171

Fatty acids, blood, feeding concentrates containing soybean oil, 57
milk fat, changes, milking, 65
feeding concentrates containing, coconut oil, 73
soybean oil, 49, 57
rumen, feeding unsaturated oils, varying roughage, 363
Fibre intake, milk yield and composition, 381
Folley, S. J., obituary, 1

Glucose, metabolism, lactating mammary gland, sow, 315
Goats, milk, water-soluble constituents, concentration, 333
Great Britain, butterfat, vitamin D content, comparison, New Zealand, 209

Heat treatment, *see* **Sterilization**
Hormones, mammary gland, effect on (review), 419
milk secretion, control, 237

Lactation, *see also* **Milk secretion**
stage, milk fat globule membrane, chemical composition, 409
viscosity, adhesive strength, casein, 281
β-Lactoglobulin, κ-casein, interaction, heat-induced, 343
milk, denaturation, direct, indirect, UHT sterilization, 403
Lipids, content, blood, feeding concentrates containing soybean oil, 57

Mammary gland, cooling, milk production, 3
metabolism, glucose, palmitic acid, stearic acid, sow, 315
organ culture techniques (review), 419
Metabolic profile test, dairy herds, use of computer, 353
Milk, esterases, 171
removal of fission products, double-bed process, 217
UHT sterilization, changes, storage, 145, 193, 323
colour, stability, effect of pH, 393
direct, indirect, whey protein denaturation, 403
Milk composition, feeding, concentrates, containing, soybean oil, 43
unsaturated oils, varying roughage, 363
varying ratios roughage, 287, 295
urea, ammonium sulphate, ewes, 309
level of energy-, fibre-intake, 381

Milk composition, udder temperature, reduction, 3
UHT sterilized, stored, 145, 193, 323
water-soluble constituents, concentration, 333
Milk fat, content, milk, feeding unsaturated oils, varying roughage, 363
fatty acids, milk, changes during milking, 65
feeding concentrates containing, coconut oil, 73
soybean oil, 49, 57
fractions, chemical composition, physical properties, 179
globules, membrane, chemical composition, lactation, 409
vitamin D content, season, solar radiation, 209
Milk fat yield, feeding concentrates containing, coconut oil, 73
soybean oil, 49
Milk powder, pathogenic bacteria, survival (review), 91
Milk production, bloat control by 'pluronic', 303
Milk secretion, hormonal control, 237
Milk yield, feeding, concentrates, containing, soybean oil, 43
varying ratios roughage, 287, 295
urea, ammonium sulphate, ewes, 309
level of energy-, fibre-intake, 381
Milking, fatty acid changes, milk fat, 65

New Zealand, butterfat, vitamin D content, comparison, Great Britain, 209
Nitrogen metabolism, physical form, barley, 33

Palmitic acid, metabolism, lactating mammary gland, sow, 315
Pepsin, proteolysis, casein, influence of sodium chloride, 165
pH, milk, colour, stability, after UHT treatment, 393
Pigs, lactating mammary gland, metabolism, glucose, palmitic acid, stearic acid, 315
milk, water-soluble constituents, concentration, 333
Pluronics, bloat control, milk production, 303
Proteins, casein micelle stabilizers, 9
whey, *see* **Whey proteins**
Proteolysis, casein by rennin, pepsin, influence of sodium chloride, 165

Radioactive nuclides, removal from milk, double-bed process, 217
Rennet, casein coagulation, kinetic model, 115
-treated casein micelles, electrophoresis, 151
Rennin, action on β-casein, 269
proteolysis, casein, influence of sodium chloride, 165
purification, 69
Roughage, variation, unsaturated fish oils, rumen fluid composition, milk fat content, 363
varying ratio to concentrates, milk yield and composition, 287, 295
Rowland, S. J., obituary, 265
Rumen, fluid, composition, feeding unsaturated oils, varying roughage, 363
nitrogen metabolism, physical form, barley, 33

Season, vitamin D content, butterfat, 209
Sheep, milk, water-soluble constituents, concentration, 333
milk yield and composition, feeding urea, ammonium sulphate, 309
nitrogen metabolism, physical form, barley, 33
Skim-milk, continuous fermentation, sour curd cheese production, 127, 137
Sodium chloride, casein proteolysis by rennin, pepsin, 165
Solar radiation, vitamin D content, butterfat, 209
Soybean oil, in concentrates, blood, lipids, content, 57
milk fat yield and composition, 49, 57
milk yield and composition, 43
Stearic acid, metabolism, lactating mammary gland, sow, 315
Sterilization, UHT, milk, changes after storage, 145, 193, 323
colour, stability, effect of pH, 393
direct, indirect, whey protein denaturation, 403
Storage, milk, UHT sterilized, changes, 145, 193, 323
Streptococcus lactis, growth, acid production, continuous milk fermenter, 127

Thiamine, deficiency (review), 79

Urea, fed, sheep, milk yield and composition, 309

Vitamin B_1, *see* **Thiamine**
Vitamin D, content, butter, season, solar radiation, 209

Whey proteins, milk, denaturation, direct, indirect, UHT sterilization, 403
